Machine Learning: Where to Apply in Theoretical Physics - Preliminary Lecture

Jim Halverson

Northeastern University, Boston

Recent Results at the Intersection of Machine Learning and Theoretical Physics

Abstract: In this talk I will provide a birds-eye-view of some results in machine learning and theoretical physics from the last year, including their motivation and techniques. Topics discussed will include machine learning for Calabi-Yau metrics, knot theory, lattice-QCD, and a correspondence between QFT and neural networks.

June 8, 2021 - 3 pm
Online meeting
